

ANDRO SECURE GROUP

INTEGRATED MARITIME PROTECTION ECOSYSTEM

Securing Vessels. Protecting Cargo. Preserving Continuity.

In today's maritime environment, security is no longer confined to the perimeter of a vessel. Modern threats extend across ports, supply chains, digital infrastructure, executive personnel, and critical business operations.

Andro Secure Group delivers a comprehensive protection ecosystem designed to safeguard every element of maritime operations through a unified security architecture that combines maritime protection, advanced surveillance technology, executive protection, cyber security, medical support, and facility security under a single command structure.

The result is greater resilience, faster response capability, enhanced operational continuity, and measurable reductions in risk exposure.

A NEW STANDARD IN MARITIME PROTECTION

Traditional security providers focus on isolated services.

Andro Secure Group delivers an integrated operational framework where maritime security personnel, drone assets, intelligence resources, cyber specialists, medical responders, and executive protection teams work together as a single coordinated force.

This unified approach provides clients with:

- ✓ Faster threat detection
- ✓ Accelerated incident response
- ✓ Enhanced situational awareness
- ✓ Reduced operational disruption
- ✓ Improved asset protection
- ✓ Lower overall security management costs

- ✓ Stronger business continuity
- ✓ Increased stakeholder confidence

OUR PROTECTION ECOSYSTEM

Maritime Security Operations

Protecting vessels, crews, and cargo from harbor to destination.

Our maritime protection capabilities provide visible deterrence, proactive monitoring, and rapid response support across commercial shipping operations, offshore assets, ports, and maritime infrastructure.

Capabilities include:

- Vessel protection underway and in harbor
- Cargo security oversight
- Port security coordination
- Waterside patrol operations
- Threat monitoring and intelligence
- Security escort planning
- Incident response management

Advanced Drone Surveillance

Eyes on the Horizon. Intelligence in Real Time.

Technology-driven situational awareness is central to modern maritime security.

Our integrated drone fleet provides persistent monitoring capabilities that significantly enhance threat detection while reducing response times.

Air Drone Capabilities

- Aerial surveillance
- Thermal imaging
- Vessel approach monitoring
- Facility inspection
- Incident assessment

- Real-time intelligence feeds

Drone Boat Capabilities

- Waterside perimeter patrol
- Harbor security monitoring
- Intrusion detection
- Coastal surveillance
- Critical infrastructure protection

The combination of autonomous and human-operated surveillance assets creates a multi-layered security shield around client operations.

Executive Protection

Protecting Leadership, Reputation, and Strategic Assets

Senior executives, technical specialists, vessel masters, and key decision-makers often represent critical operational assets.

Our executive protection services provide discreet, professional security solutions that support business continuity while maintaining operational flexibility.

Services include:

- Close protection teams
- Secure transportation
- Travel risk management
- Residential security
- Event protection
- International movement coordination

Medical Response & Emergency Support

When Every Minute Matters

Maritime incidents can escalate rapidly.

Our emergency response framework ensures immediate access to professional medical coordination, emergency planning, and evacuation support when required.

Capabilities include:

- Emergency medical coordination
- Maritime evacuation planning
- Telemedicine support
- Incident escalation management
- Crisis response integration
- Trauma support services

Facility & Port Security

Protecting Critical Maritime Infrastructure

Modern maritime operations depend on secure shore-based infrastructure.

Andro Secure Group protects warehouses, logistics hubs, offices, terminals, and operational facilities through layered security strategies that reduce vulnerabilities and improve operational resilience.

Services include:

- Perimeter protection
- Access control management
- Security personnel deployment
- Surveillance integration
- Incident management
- Security risk assessments

Cyber Security for Maritime Operations

Protecting the Digital Maritime Environment

As vessels and ports become increasingly connected, cyber threats have emerged as one of the most significant risks facing the maritime industry.

Our cyber security specialists help clients secure operational technology, business systems, communications platforms, and critical digital assets.

Capabilities include:

- Security monitoring
- Threat detection
- Incident response
- Vulnerability assessments
- Security awareness training
- Business continuity support

THE POWER OF INTEGRATION

The greatest advantage of the Andro Secure Group model lies not in any individual service but in the coordination of all services through a single operational framework.

By integrating maritime security, executive protection, drone technology, medical support, cyber security, and facility protection into one managed solution, clients benefit from:

One Security Partner

A single point of accountability across all protection disciplines.

One Operational Picture

Shared intelligence and coordinated decision-making.

One Response Framework

Faster action during incidents and emergencies.

One Strategic Objective

Protecting people, assets, operations, and reputation.

This integrated model consistently delivers greater efficiency and stronger protection outcomes than fragmented security arrangements involving multiple vendors.

WHO WE SERVE

- Commercial Shipping Operators
- Maritime Logistics Companies

- Port Authorities
- Offshore Energy Operators
- Mining Exporters
- High-Value Cargo Owners
- Cruise Operators
- Government Maritime Agencies
- Critical Infrastructure Operators
- International Trade Organizations

ANDRO SECURE GROUP

Maritime Protection Beyond Security

We deliver confidence.

Confidence that vessels will arrive safely.

Confidence that operations will continue uninterrupted.

Confidence that people, cargo, facilities, and critical systems remain protected against evolving threats.

Because in the modern maritime environment, protection is not a service.

It is a strategic advantage.
