COMPANY OVERVIEW

Andro Secure Group Naval Division is a specialized maritime security, protection, and risk management organization delivering integrated security solutions to commercial shipping operators, offshore energy companies, port facilities, government agencies, critical infrastructure operators, and maritime logistics organizations.

Our mission is to safeguard vessels, personnel, cargo, facilities, and maritime operations through a comprehensive protection ecosystem that combines highly trained personnel, advanced technology, intelligence-led operations, medical support, executive protection, cyber security, and rapid response capabilities.

Operating across international maritime environments, our Naval Division provides clients with a single-source security partner capable of addressing complex threats throughout the maritime domain.

OUR MISSION

To deliver world-class maritime security and risk management solutions that protect lives, assets, operations, and reputations while enabling uninterrupted business continuity in challenging operational environments.

CORE CAPABILITIES

Maritime Security Operations

We provide layered maritime protection services designed to reduce risk and enhance operational resilience.

Capabilities include:

- Vessel security operations
- Harbor and port security
- Cargo protection and monitoring
- Waterside security patrols
- Maritime risk assessments
- Security escort operations
- Offshore asset protection
- Maritime intelligence support
- Security operations planning
- Incident response coordination

Maritime Protection Ecosystem

Unlike traditional providers that offer isolated services, Andro Secure Group integrates multiple security disciplines into a single operational framework.

Our ecosystem includes:

Sea Domain

- Vessel protection • Coastal monitoring • Waterside patrol operations • Drone boat surveillance

Air Domain

- Aerial surveillance • Thermal imaging operations • Reconnaissance support • Incident assessment

Land Domain

- Facility protection • Access control • Perimeter security • Executive protection

Digital Domain

- Cyber security monitoring • Threat detection • Incident response • Security awareness programs

Medical Domain

- Emergency medical coordination • Evacuation planning • Crisis response support • Trauma management

SPECIALIZED SERVICES

Port & Harbor Security

- Access control management
- Terminal security
- Berth protection
- Cargo yard security
- Security patrol operations
- Incident management

Offshore Security

- Offshore platform protection
- Support vessel security
- Marine infrastructure protection
- Risk mitigation planning

Executive Maritime Protection

- Close protection services
- Secure transportation
- Travel risk management

- Residential security
- Executive movement planning

Maritime Cyber Security

- Security assessments
- Vulnerability management
- Threat monitoring
- Incident response support
- Security awareness training

Emergency & Medical Support

- Emergency response planning
- Medical coordination
- Evacuation support
- Crisis management assistance

TECHNOLOGY CAPABILITIES

Our Naval Division leverages advanced technologies to improve situational awareness and operational effectiveness.

Drone Boat Systems

Capabilities include:

- Waterside patrol operations
- Harbor surveillance
- Intrusion detection
- Coastal monitoring
- Infrastructure inspection

Unmanned Aerial Systems

Capabilities include:

- Day and night surveillance
- Thermal imaging
- Maritime reconnaissance
- Facility monitoring
- Incident assessment
- Intelligence gathering

Integrated Command & Control

- Real-time monitoring
- Operational coordination
- Incident management
- Threat intelligence integration
- Crisis response support

INDUSTRIES SERVED

Andro Secure Group Naval Division supports clients across multiple sectors:

- Commercial Shipping
- Maritime Logistics
- Port Authorities
- Offshore Oil & Gas
- Offshore Renewable Energy
- Mining & Commodity Exporters
- Government Agencies

- Critical Infrastructure Operators
- Cruise & Passenger Vessel Operators
- International Trade Organizations

DIFFERENTIATORS

Integrated Security Ecosystem

A single provider delivering maritime, physical, executive, cyber, medical, and technology-driven protection services.

Intelligence-Led Operations

Threat assessments and operational planning informed by risk analysis and situational awareness.

Multi-Domain Protection

Protection capabilities spanning maritime, air, land, cyber, and executive security environments.

Rapid Response Framework

Structured response protocols designed to minimize operational disruption and reduce incident impact.

Client-Focused Solutions

Scalable services tailored to specific routes, facilities, assets, operational requirements, and threat environments.

VALUE TO CLIENTS

Our clients benefit from:

- Reduced operational risk
- Enhanced asset protection
- Improved situational awareness
- Faster incident response
- Reduced management complexity

- Greater business continuity
- Enhanced stakeholder confidence
- Cost efficiencies through integrated service delivery

COMMITMENT TO EXCELLENCE

Andro Secure Group Naval Division is committed to delivering professional, ethical, and effective maritime security solutions that support the safety, security, and continuity of our clients' operations worldwide.

Through a combination of skilled personnel, advanced technology, intelligence-driven operations, and integrated protection services, we provide the confidence required to operate securely in today's dynamic maritime environment.
